## Suspension Mounting Kits

Suspension Mounting Kits act as a link between the shock absorber and vehicle chassis. Why replace your worn Suspension Mounting Kit with KYB Suspension Mounting Kits ?

To :

- Reduce suspension vibration and noise
- Improve steering
- Eliminate noises while steering
- Keep the shock absorber positioned correctly for optimal steering geometry

## Coil Spring & Leaf Spring

- K-Flex standard
- Lift up coil spring
- Lowdown coil spring
- Leaf spring

When to replace Coil Springs?

It is recommended that Coil Springs are checked annually to determine their condition, and they should be changed after 4 years or 80,000 km. Why replace Coil Springs ?

To :

- Maintain comfort, performance and safety
- Correct steering geometry
- Correct vehicle ride height
- Reduce deterioration of shock absorbers

## Protection Kits

Protection kits are a critical element for optimal shock absorber performance. Why replace your worn Protection Kits with KYB Protection Kits

To :

- Protect the piston rod from damage and rust.
- Protect the sealing joint to avoid oil leakages
- Absorb road defects to maintain comfort
- Reduce the risks to damage suspension components

A vehicle suspension is made up of three components, the tyre, the spring and the shock absorber.

All three components need to be in good working order to keep the tyre properly in contact with the road.

The basic function of a shock absorber is to keep the vehicle tyres in contact with the road.

The shock absorber regulates the movement of the spring and is the final crucial link in ensuring a smooth and more importantly safe ride.

Even with new tyres and new brakes, unless all shock absorbers are in good working order vehicle safety is compromised because of reduced wheel contact with the road.

*Our Precision, Your Advantage*

KYB technology is entrusted on aircraft, Japanese Bullet Trains, the Tokyo Skytree and by vehicle manufacturers across the world.

Over 80 years of hydraulic expertise from Japan's largest hydraulic manufacturer goes into every single one of our vehicle shock absorbers.
